Anthony Almanza, Front End Developer

System and Programming analysis student with a focus on web development. I'm a generalist in a variety of technology,tools, and enjoy learning new programming paradigms. My past professional roles have been in tourism, customer service, fine dining, and sales.

Projects

Mini Todo Flask App

I built this application in the micro-framework Flask . The user can create tasks and the information is displayed in a styled table. The app allows creation, reading, updating , and deletion of desired tasks.

A working version is hosted using the Heroku platform,
